Japanese knives for professional chefs

About sen ②

In the darkness of the blacksmith's forges, the blade arises and enlightens us with a perfect and balanced shape made to support top chefs duties. From the hand-forged stainless-steel to the wooden handle, sen ② finds its way to professional kitchens, offering sharpness, accuracy, long-lasting and Kire-aji ① to the cuisine.

Our motto

We accompany worldwide chefs in their quest of excellence, in their pursuit of quality product providing kire-aji knives. Not only sharps, the knives are also crafted to achieve precision and perfection in the food cutting. Kohmi ② flavor, Hojun ③ taste are enhanced thanks to this passionate work, bringing out the best of the ingredients.

At sen ④, we believe in Zanshin. Literally, the remaining heart, it's a notion used in Japan martial arts but also in Buddhism, to describe how our heart is put in an action. In our knives, that's the blacksmith's work and heart that remains in our blades.

Designed for chefs

sen ④ is a knives collection entirely hand-crafted in Sakai ④, an emblematic blades production region in Japan. Each knife has been forged, hammered, and sharpened by skillful artisans. We value the work of craftsmen and know-how of the Sakai region. Our brand is a tribute to their work and techniques.

sen ④ is designed by Parisian design studio Noir Vif.

Migaki finishes

Quality production

Made with Gingami 3. High-quality stainless steel made by Hitachi Metals, that combines the hardness of the carbon steel and the corrosion resistant characteristics of stainless steel. Requiring skillfuled blacksmith to be manipulated, artisans from Sakai are the rare craftsmen able to achieve outstanding Gingami 3 blades. All knives handles are made in Japanese wooden dyed in natural indigo. Our knives are available in 3 different finishes: Migaki (brushed), Kurouchi (black), and Kyomen (Mirror).

Besides our emphasis to a local production, we believe in long lasting objects, in a slower consumption where products shall not be over and over renewed. That is the reason why we seek the best materials for sen 閃 knives. that excellence in our products results in a highly skilled manufacturing process, and outstanding material like the Gingami 3 stainless steel used in our blades. Lastly, in our efforts to reduce our impact on the environment, we also decided for sen 閃, to use mainly eco-friendly packaging.
